

IL&FS Water Ltd, headquartered in Chennai, is implementing a number of path breaking project initiatives in the urban water & sewage, desalination, and reuse (industrial effluent & domestic sewage) area. The company offers end to end solutions to the customers covering technology, development, financing and implementation of water projects.

In order to meet the challenges of current and future projects, applications are invited from deserving candidates, for the following positions

- **Project Managers** **Code: W 01**
Degree in Chemical/Civil/Mechanical engineering with minimum 10 years experience & proven track record of delivering water/ wastewater/desalination projects or projects in the process industries sector. Candidates should demonstrate strong leadership qualities, good communication and contract management skills and possess sound commercial acumen.

- **Business Development Managers** **Code: W 02**
Degree in Chemical/Civil/Mechanical engineering with minimum 15 years marketing experience with EPC companies in the water/wastewater/desalination sector. Candidates should demonstrate strong technical knowledge, good communication skills, extensive understanding of the market and sound commercial acumen.

- **Head – Project Engineering** **Code: W 03**
Degree in Civil/Mechanical/Chemical engineering with a minimum of 15 years experience in detailed engineering. Should have demonstrable experience in heading multidisciplinary engineering teams in consulting/EPC companies involving process design, detailed engineering and project costing.

- **Engineering Manager – Civil (1)** **Code: W 04**
M Tech in Civil / Structural Engineering with at least 10 years' experience in the design of civil structures for water/waste water/desalination projects with emphasis on water-retaining structures.

- **Engineering Manager – Electrical / Instrumentation** **Code: W 05**
Degree in electrical engineering with about 10 years experience in the design of HT/LT electrical systems and or instrumentation systems as applicable to water/wastewater/desalination projects.

- **Project Engineers** **Code: W 06**
Degree in Civil/Mechanical/Chemical/Electrical engineering with 1 - 3 years experience in project planning, process design, contract management or site supervision of water supply / water and waste water treatment / desalination projects

- **Construction Managers** **Code: W 07**
Degree in Civil engineering with minimum 10 years experience in construction supervision. Candidates should have proven experience in management and delivery of large civil engineering contracts. Experience in construction of water-retaining structures would be an added advantage.

- **Erection Supervision Engineers – Mechanical** **Code: W 08**
Degree in Mechanical engineering with at least 5 years proven experience in independent erection supervision of mechanical equipment / rotating machinery in process industries.

- **Erection Supervision Engineers – Electrical/Instrumentation** **Code: W 09**
Degree in Electrical engineering with at least 5 years proven experience in independent erection supervision of HT/LT electrical equipment and a wide range of field / panel mounted instruments, SCADA and PLC operated systems applicable to process industries.

Positions W01 – W05 are based in Chennai, with need-based travel requirements.

Position W06 could be based in Chennai or in project sites in various states.

Positions W07 – W09 would be based in project sites in Tamilnadu, Maharashtra, Andhra Pradesh, Gujarat, and Rajasthan .

Compensation would be the best in industry and would not be a constraint for deserving candidates
