

Nandan Plans eco-zones to make bio-fuel

Hyderabad May 09, 2008

Nandan Biomatrix, a Hyderabad-based agri-biotechnology and medicinal plantation company, is planning to set up bioinvestment eco-industrial zones (BIEZs) across the country. The project aims to bring fallow land under jatropha cultivation, which will be used to make biofuel. **IL&FS Infrastructure Development Corporation**, which is associated with the development of the project, is preparing a feasibility report
